SIGMA INDUSTRIES ANNOUNCES THE CLOSURE OF ITS ACTON VALE PLANT

Quebec City, Quebec, April 28, 2009 — Sigma Industries Inc. (TSX Venture Exchange: SIC), a manufacturing company specialized in the production of composite and metal components, announces the upcoming closure of its Acton, Vale, Quebec manufacturing facility. The closure is scheduled for mid-September 2009 and Management estimates the process will result in a non-recurring charge of \$300,000 to be recognized in the second quarter of the Company's 2010 fiscal year that began on April 26, 2009.

At the moment, only about 40 employees are at work because of difficult conditions in the main market segments serviced by the facility which mainly manufactures composite hoods for the heavy truck and vocational truck markets. Production of components that will be terminated upon closure of the plant represent annual sales of approximately \$6 million with only one client who favoured a new technology for its outsourced work.

"We regret the impact of these measures for our employees and their families, but production rates must appropriately reflect difficult market conditions caused by the global financial and economic crisis that continues to prevail in the heavy-duty truck industry," said Denis Bertrand, President and Chief Executive Officer.

ABOUT SIGMA INDUSTRIES

Sigma Industries Inc. (TSX-V: SIC), a manufacturing company specialized in the production of composite and metal components, has six operating subsidiaries and employs close to 300 people. The Company is active in the heavy-duty truck, coach, transit and bus, train and subway, machinery, agriculture, and wind energy market segments. Sigma sells its products to original equipment manufacturers and distributors in the United States, Canada and Europe.
